### **Light Cutting Oil**

<b>Peco Catalog#</b>	<b>UPC</b>	<b>Size</b>	<b>Case Quantity</b>
30201	705591 30201 3	Quart	12
30202	705591 30202 0	Gallon	6

**Light cutting oil is a heavy duty, premium quality, light colored oil for all type of ferrous metals including stainless steels. The balanced combination of oils and additives helps assure excellent surface finishes and tool life. The light color allows greater work piece visibility and better operator acceptance. Light cutting oil should be used as received or may be diluted with other blending oils to custom formulate an oil for your exact operation. This product does not contain any chlorine, but does contain active sulfur. This active sulfur additive allows this product to outperform many of the pipe cutting and threading oils on the market today.**

**The active sulfur in this oil can stain aluminum and other non-ferrous metals so care should be taken when cutting these metals. Always test a sample of the metal first before using.**

<b>Viscosity</b>	<b>Approx 42 cSt @ 40 Degree Celsius</b>
